**Rexel SA**

Update to credit analysis

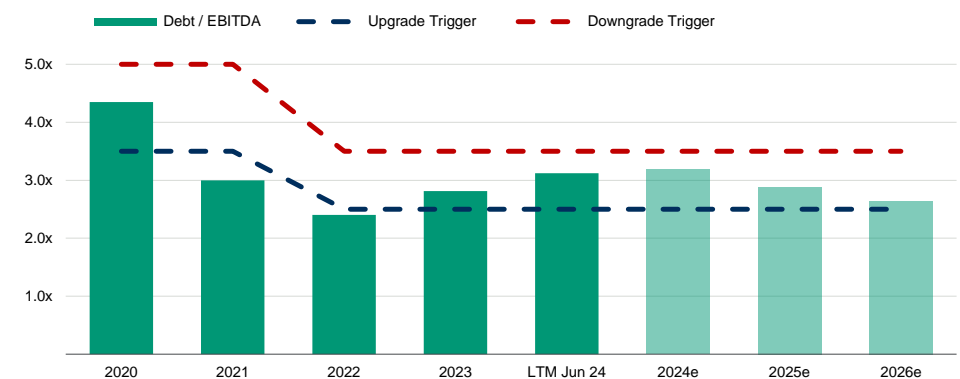

**Summary**

Rexel SA's (Rexel) Ba1 corporate family rating (CFR) with a stable outlook reflects its solid business profile, underpinned by balanced geographical and end-market diversification; exposure to positive market fundamentals that mitigates industry cyclicality, including electrification, automation and the need for energy-saving solutions; and improved business resilience because of the digital transformation initiated since 2017.

Rexel's structurally improved business fundamentals have been evident even amid challenging market conditions, such as weaker demand in the residential market, particularly in Europe, and deflationary pressure. Despite these challenges, Rexel's credit metrics remain aligned with the current rating, including debt/EBITDA of around 3.0x as of June 2024, when we anticipate the company's performance to bottom. We forecast credit metrics will stay around these levels in 2024, improving from 2025 and leading to debt/EBITDA between 2.5x and 3.0x. This forecast is based on market recovery, contributions from acquisitions and the implementation of Rexel's strategic plan, which encompasses continuous investment in digitalization and cost management. Our forecast excludes the payment of potential fees related to the ongoing antitrust investigation in France.

Exhibit 1

**Rexel's debt/EBITDA will remain below 3.0x over the next three years**

Source: Moody's Ratings

## Credit strengths

- » Large-scale and globally diversified operations, which provide resilience to the business
- » Positive medium- to long-term demand outlook, driven by electrification and energy efficiency
- » Solid positive free cash flow (FCF) generation
- » Prudent financial policy, balancing a net leverage target of around 2.0x (excluding IFRS 16 leases)

## Credit challenges

- » Exposure to cyclical end markets, such as the construction and industrial sectors, mitigated by well-diversified operations
- » Competitive industry, with high level of market fragmentation in certain countries like the US
- » Structurally low profitability typical of this business model, although improved steadily over the past five years

## Rating outlook

The stable rating outlook assumes that Rexel's credit metrics will remain in line with the levels required for the current rating over the next 12-18 months, including Moody's-adjusted debt/EBITDA of around 3.0x.

## Factors that could lead to an upgrade

The ratings could be upgraded if Rexel continues to grow earnings and demonstrates a track record of maintaining a prudent financial policy, leading to Moody's-adjusted debt/EBITDA declining sustainably towards 2.5x, Moody's-adjusted retained cash flow/debt of above 25% or the operating profit margin improving to the high-single-digit range in percentage terms. We could relax the triggers if the company continues to demonstrate evidence of a stronger business profile translating into improved resilience through market cycles and structurally higher profitability, in line with its strategy.

## Factors that could lead to a downgrade

The ratings could be downgraded if Moody's-adjusted debt/EBITDA increases above 3.5x on a persistent basis, Moody's-adjusted retained cash flow/debt falls below 15% or the operating profit margin persists below the mid-single-digit range in percentage terms.

## Profile

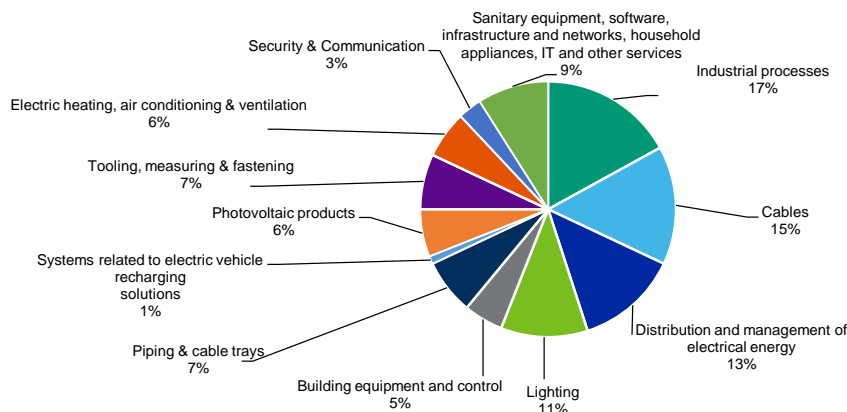

Headquartered in Paris, France, Rexel SA (Rexel) is a global leader in the low- and ultralow-voltage electrical distribution market.

In the 12 months that ended June 2024, Rexel reported total sales and company-adjusted EBITA of €19 billion and €1.2 billion, respectively. Exhibit 3 shows a split of revenue by product range.

Rexel is listed on Euronext Paris.

Exhibit 3

The product families presented above correspond to the sole activity of professional distribution of electrical equipment.  
Source: Company

## Detailed credit considerations

### Balanced geographical footprint and positive market fundamentals will continue to support demand for Rexel's products despite some weaknesses in 2024

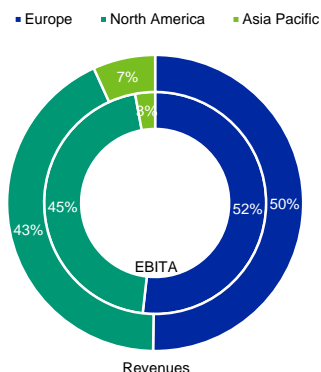

Despite a decline in demand for some product categories since the second half of 2023, Rexel's performance has remained solid, because of the company's balanced geographical distribution (see Exhibit 3) and a diverse mix of end markets (see Exhibit 4). This mix notably includes high exposure to the more resilient commercial and industrial segments. However, demand in 2024 has mainly been hurt by continued weaknesses in the residential market, especially in Europe, and a normalization of demand for electrification following a spike in 2022 and the first half of 2023.

Over the medium to long term, Rexel is poised to benefit from the increased demand for low- and ultra-low-voltage electrical products. The growth in electrical applications and solutions, coupled with efforts to decarbonize the economy — as illustrated by green spending plans in the US and Europe — will serve as structural growth drivers.

Given Rexel's limited exposure to the office segment and sustained demand from the other commercial and industrial segments, along with the ongoing trend towards electrification and contribution from acquisitions, we expect revenue to increase in the low single digit percentage in 2024. In H1 2024, the company reported a 3.5% decline in sales on a same-day basis with a gradual improvement during the period. Our forecast assumes this improving trend will continue, further aided by an easier comparison with H2 2023. For 2025, we expect demand to further strengthen, in line with the recovery of the construction cycle, potentially leading to mid-single-digit organic revenue growth.

The future demand for products related to energy efficiency — such as solar panels, EV charging infrastructure, and heat ventilation air conditioning electrification — will also be influenced by the evolution of subsidies, particularly in Europe, following the demand spike in 2022 driven by record-high energy prices. Upcoming elections in European countries and the US in 2024 and 2025 introduce some uncertainty, but we expect the long-term fundamentals to remain solid. Rexel estimates that around 32% of its revenue is tied to fast-growing categories, namely energy efficiency and automation.

Exhibit 4  
Breakdown of sales and EBITA by region, 2023

Source: Company

Exhibit 5  
Breakdown of sales by end market and by region, 2023

Source: Company

**Profitability has structurally improved, but remains inherently exposed to price variation**

Despite the decline in revenue in H1 2024, the company's adjusted EBITA margin was around 6% in the same period (6.8% in 2023). Despite the margin decline, this level of profitability is higher than that in 2019 because of gross margin expansion on the back of measures such as data-based pricing and value-added services; improvement in productivity, reflecting increasing investments in digital; and portfolio management. Underlying market growth and net inflation contributed positively to margins expansion between 2019 and 2023.

We expect the company's profitability to increase further over the next three years, with EBITA margin above 7%, in line with management's medium-term target communicated during the capital market day in June 2024. Improvement in profitability will be driven by market recovery, low single-digit percentage growth in inflation, exposure to positive market fundamentals, market share gains and continued portfolio management. This includes improving profitability in countries currently operating below the group's levels, such as the UK and Germany.

Rexel's digital transformation will continue to further support profitability improvements, facilitating operational adaptation and efficiencies (for example, pricing, inventory levels or receivable collections). The company targets to increase digital sales from 31% currently to 50% in the medium term. Rexel is also likely to make small acquisitions for new digital solutions, potentially rolling these out group wide.

Exhibit 6  
Moody's-adjusted EBITA margin likely to remain between 6.5% and 7% over the next three years

Source: Moody's Ratings

In 2024, profitability has been hurt by both volumes and price deflation in some product categories such as piping, industrial automation in China and solar panel (less than 10% of revenue), and decline in cable prices. Inflation in other product categories remains stable. We expect inflation to contribute positively over the next two to three years; however, the company's profitability will remain exposed to price fluctuation, particularly in the cable segment (below 20% of revenue), where prices are driven by copper price evolution.

Since 2019, the company exited less-profitable and non-strategic countries such as Norway and Spain, and expanded its presence in more strategic end markets and countries, such as through the acquisition of [heat pumps distributor Wasco in the Netherlands in 2023](#) and of the distributor of wireless infrastructure products and solutions Talley in Q2 2024. Given the market's fragmented nature, acquisitions will continue to be integral to Rexel's strategy. Despite Rexel's leading position in Europe and North America, the market remains fragmented. In Europe, Rexel is the second-largest distributor behind Sonepar, with 17%-18% market share, and ranks first or second in 10 out of 17 countries it operates in. In the US, Rexel's market share is around 6%. The company plans to add 2%-3% to sales growth over the next three years.

### Credit metrics and financial policy support the Ba1 rating

As of June 2024, Rexel's credit metrics were well within the range required for the Ba1 rating, including Moody's-adjusted debt/EBITDA of around 3.0x (2.8x in 2023). We expect leverage to remain around these levels in 2024 and to decline towards 2.5x over the next 12-18 months on the back of market recovery and the company's strategic initiatives. Our forecast excludes the payment of potential fees related to the ongoing antitrust investigation in France.

We also expect Rexel to continue to generate positive FCF between €200 million and €300 million over the next 12-18 months. This forecast includes the company's dividend payout policy of at least 40% of recurring net income and capital spending of around 0.9% of total revenue. FCF will be used to fund acquisitions and fund the company's share buyback program of €50 million-€150 million per year.

We also expect the company to maintain a prudent financial policy, reflecting the company's net leverage target of up to 2.0x, which is equivalent to Moody's-adjusted debt/EBITDA of up to 3.0x-3.5x. This level of leverage is in line with the requirement of the current rating.

## ESG considerations

### Rexel SA's ESG credit impact score is CIS-3

Exhibit 7

#### ESG credit impact score

Source: Moody's Ratings

Rexel's ESG credit impact score of **CIS-3** indicates that ESG considerations have a limited impact on the current credit rating. This reflects the company's progress in deleveraging in line with its net leverage target and in spite of its acquisitive strategy. The score also takes into account positive demand fundamentals and the company's contribution to the carbon transition through its product portfolio, which partly offset its reliance on a large vehicle fleet.

Exhibit 8

**ESG issuer profile scores**

Source: Moody's Ratings

**Environmental**

Rexel is exposed to similar environmental risks as other rated distribution companies. These risks are primarily tied to carbon transition and emissions reduction, as product transport, which currently relies primarily on combustion engine vehicles, remains integral to its operations.

**Social**

Rexel is exposed to similar social risks as other rated distribution companies. While the demand for Rexel' products benefits from positive secular trends from electrification, automation and energy efficiency, the increasing focus on decarbonization and reducing pollution from transportation could increase the need to accelerate the transition to lower emission levels over time.

**Governance**

Rexel has demonstrated a prudent financial policy. At the same time, given the company's acquisitive strategy and currently low leverage, below its net leverage target of 2.0x (around 3.0x Moody's gross leverage), there is some risks that leverage might increase over time, although remaining in line with our expectations for the Ba1 rating.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moody's.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

**Liquidity analysis**

We view Rexel's liquidity as adequate. The company's liquidity is supported by our expectation of positive annual Moody's-adjusted FCF of around €200 million over the next 12-18 months, cash balances of €417 million as of June 2024 and access to an undrawn revolving credit facility of €700 million. The securitisation programmes of around €1.5 billion in aggregate will largely mature between 2025 and 2026, and are likely to be rolled over. Apart from receivable financing, Rexel does not have significant debt maturities before June and December 2028 when the senior notes mature.

The terms and conditions of the RCF agreement offer flexibility in terms of maintenance financial covenants (tested semiannually, in June and December). This is because Rexel can exceed its 3.5x net leverage ratio as defined by the senior facility agreement on three separate accounting dates during the life of the RCF; only two of such three accounting dates may be consecutive, provided that the ratio does not exceed 3.75x on two accounting dates and 3.90x on one accounting date. We expect the company to stay well in compliance with its maintenance covenant over the next 12-18 months.

**Structural considerations**

The senior unsecured notes are rated Ba1, in line with the CFR. In accordance with our Loss Given Default (LGD) methodology, we would typically notch down all Rexel's senior unsecured debt to Ba2 because of the magnitude of non-debt liabilities, including trade payables, which are structurally senior to the notes. However, we have applied an override to this notching, reflecting the strong positioning of Rexel in the Ba1 rating and our expectations that trade payables would decline during downturns, increasing the recovery for the notes.

## Methodology and scorecard

The current scorecard-indicated outcome is in line with the assigned rating. The forward-view scorecard-indicated outcome of Baa3 is one notch above the assigned rating, reflecting the improvement in credit metrics in line with our expectations on the construction cycle. The difference with the current rating assigned reflects risk of a more prolonged construction downturn.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at [www.moody's.com](http://www.moody's.com) under the heading "Investor Relations — Corporate Governance — Charter Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V., I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Clasificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions (as defined in Moody's Investors Service Rating Symbols and Definitions): Please note that a Second Party Opinion ("SPO") is not a "credit rating". The issuance of SPOs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
